DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by either Newman or Kosaka et al.

As now broadly worded, the method for manufacturing a composite optical elements of claims 1 and 13 inherently reads on either Newman or Kosaka et al. The term "manufacture" is construed to mean "create, produce, or turn out in a mechanical

manner”(see: The American Heritage Dictionary). In the rejection, the functional device of Newman is represented by numeral 120, and the holding member, numerals 104 and 106. For Kosaka et al, numerals 60 and 70, and 20 and 40, respectively.

Claims 1 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Nemoto et al ('603 or '864). In the rejection, the functional device of these references is represented by numerals 56 and 57, and the holding member, by numeral 80.

Allowable Subject Matter

Claims 2-10 are allowed.

Claims 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Minor suggestion made in the claims

In claim 10: line 2, “step” should be -- steps --.

Objection to minor informalities in the Specification

In pages 2-24, references made to claims 1-57 should be deleted, since only claims should depend on subject matter disclosed in the specification, not the other way around. Therefore, the portion of the specification that contains those references should be rewritten to exclude the same.
